PROFESSIONAL SUMMARY

Full Stack Developer specializing in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing RESTful APIs with Node.js and Python (FastAPI), real-time systems, role-based access control, geospatial integrations, and ML/RAG-powered features. Strong focus on performance optimization, clean architecture, and user-centric design.

EDUCATION

NED University of Engineering & Technology
Bachelor of Engineering in Software Engineering

Karachi, Pakistan
Aug 2024 – Present

PROJECTS

ServiceHub — Role-Based & Real-Time System

Live Demo

- Engineered a full-stack service marketplace connecting service seekers and providers using React.js, Node.js, Express.js, and PostgreSQL
- Implemented secure three-role authentication system (Admin, Seeker, Provider) with role-based access control
- Developed real-time chat functionality using WebSockets for seamless user communication
- Integrated H3 geospatial indexing for radius-based location filtering and service discovery
- Designed scalable backend architecture ensuring secure booking flow and data integrity

HelpGhar — Home Services Marketplace Platform

Live Demo

- Built a full-stack home services marketplace connecting customers with verified workers using React.js, TypeScript, and Tailwind CSS
- Implemented a RAG-based chatbot to answer user queries in real time
- Integrated machine learning models for gig ranking and personalized worker recommendations based on customer preferences
- Deployed the frontend on Vercel and the backend on Render, ensuring reliable and scalable hosting

Student Score Prediction System — Machine Learning Web Application

Live Demo

- Developed a machine learning model to predict student academic performance using features such as weekly study hours, attendance, and classroom participation
- Built a responsive frontend using React.js and Tailwind CSS, and developed RESTful APIs with FastAPI for seamless frontend-backend integration
- Deployed the React frontend on Vercel and the FastAPI backend on Render, ensuring reliable, scalable, and accessible application hosting

EXPERIENCE

Frontend Developer Intern — Engr. Abul Kalam Library (NEDUET)

View Certificate

Karachi, Pakistan

Jan 2026 – Jun 2026

- Worked as a Frontend Developer on an 8-week internship building an LLM-Based Book Recommendation System
- Designed and implemented user interfaces, enhancing overall user experience
- Ensured seamless interaction between frontend and backend components
- Collaborated within a team under the guidance of Associate Professor Dr. Muhammad Umer Farooq, demonstrating strong understanding of modern frontend development practices and user-centric design

Full Stack Developer Intern — Bluenet Plus

View Certificate

Karachi, Pakistan

Dec 2025 – Jan 2026

- Developing and maintaining the company's complete initiative-based website from scratch
- Architecting frontend and backend modules using PERN stack
- Designing multiple sections including service pages, initiatives, contact modules, and admin controls
- Ensuring performance optimization, scalability, and cross-device responsiveness

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, RESTful APIs, WebSockets

Databases: MongoDB, PostgreSQL, SQL

AI/ML: Machine Learning (scikit-learn), RAG Pipelines, Vector Embeddings

Tools & Practices: Git, GitHub, VS Code, Role-Based Access Control (RBAC), Agile Development
